Welcome and opening remarks

09:05–09:50

Reduce, Reuse, Recycle, Reclaim — Closing the Industrial Water Loop

Regulatory pressure, investor scrutiny and basin-level stress are forcing industries to rethink their relationship with water, moving to a model built around the four Rs: reduce consumption, recycle, reuse within operations, and reclaim for wider benefit.

SPEAKERS

- Heleen Nieuwenhuis, Director of Marketing - Total Water Management, Nalco Water-Ecolab
- Dimitra Papagiannaki, Process Engineer, Evides Industriewater
- Martin Pelle, Global WWTP Global Technology, Tate & Lyle (TBC)

MODERATOR Sara Shehi, Technology Consultant, Isle Group

09:50–10:30

Optimising Industrial Water Systems — Efficiency opportunities in cooling towers, boilers and site water circuits

This session looks at how industrial operators can improve the efficiency and reliability of critical plant water systems, from cooling towers and boilers to process water loops, while reducing consumption, improving water quality control and supporting broader water efficiency goals.

SPEAKERS

- Aurélie Grelot, Global Water Treatment Lead, Cargill
- Paul Jacob, Senior Water Innovation Manager, Danone
- Tommaso Marengo, Environment Manager, Ferrero

MODERATOR Magela Odriozola, Principal Consultant, Isle Group

10:30–11:00

Networking Break · 30 minutes

11:00–11:35

From Pilot to Practice — Industry Case Studies in Water Innovation

The most valuable knowledge in any industry forum does not come from polished presentations — it comes from peers who have tried things and are willing to be honest about the results. This session is dedicated to practitioner-led case studies from member organisations.

Case studies presentations:

- From Regulatory Challenge to Business Case: Wastewater Solutions in Specialty Chemicals – Jozef Kochan, Clariant
- Anne Saramito, Senior Group Leader RD&E Industrial Water EU, Ecolab
- Georg Stockinger, Senior Water Treatment & Integration Technologist, Shell

MODERATOR Ioanna Livaniou, Managing Director – Europe, Isle Group

11:35–12:20

Making Technology Work in the Real World — Water Conditioning and Wastewater Treatment at Scale

Which technologies hold up in complex, real-world industrial environments, and how do you select, procure and integrate them successfully?

SPEAKERS

- Jozef Kochan, Manager Environmental Technologies, Clariant
- Georg Stockinger, Senior Water Treatment & Integration Technologist, Shell
- Iván Blanco, Senior Researcher Water Solutions, ArcelorMittal (TBC)

MODERATOR Eva Martínez, Associate Director, Isle Group

12:20–12:30

Wrap-Up, Key Takeaways and Closing Remarks

12:30–14:00
